

Art Unit: 3721

1986). The teachings of Seufert applied in the invention of Campbell would not distract from the invention of Campbell. Fold lines and the transition zone are simultaneously produced by Seufert (see column 2, lines 65-66) therefore could be directly incorporated into the scoring procedure in the invention to Campbell. For the above reasons, it is believed that the rejections should be sustained.

Respectfully submitted,

Chris Harmon
